The **X International Congress of Experimental Phonetics (ICEP)** will offer, in this new edition, the opportunity to debate, reflect, and deepen knowledge on various aspects of experimental phonetics. The interdisciplinarity that has characterized this event since its origin will continue to be evident in this upcoming edition, which will feature proposals from a wide range of areas as detailed below:

- . Articulatory Phonetics
- . Acoustic Phonetics
- . Perceptual Phonetics
- . Applied Phonetics: forensic, clinical, first/second language teaching/learning, dialectology, speech technologies, etc.
- . Intonation and Rhythm
- . Prosody and Pragmatics / Discourse Analysis
- . Phonetics and Phonology
- . Sociophonetics
- . Phonetic Change
- . Historiography of Phonetics

CALL FOR PAPERS

SPECIALISED SESSIONS

- 1) Contributions of articulatory methods to the study of Iberian languages
- 2) Métodos y procedimientos para la representación de la entonación del español
- 3) Voces sintéticas: nuevos desarrollos y retos para la fonética
- 4) Fonética y fonología en la historia lingüística hispánica: perspectivas historiográficas

PROPOSALS FOR PRESENTATIONS

Proposals for presentations on open topics and/or associated with specialized sessions can be submitted. The participation modalities are as follows:

- o Individual Presentation (maximum one per participant and one as co-author).
- o Co-authored Presentation (maximum two per participant).
 - Submission of presentation proposals (open or for specialized sessions), via [the form on the website \(title, abstract between 100-150 words and main references\)](#): 07/15/2025 - 10/01/2025
 - Acceptance: 01/11/2025.
